

Declaration of Installed Objects

This declaration is evidence for "[C1] SEOJ processing specification" and "[C21] Object control."

Notes: Numerals in the *Code field are hex values. You may enter ## only for 0x##.

For a device object, enter the corresponding specification number (including Appendix) in the "Remarks" column.

Notes: Also state node profile objects. State "01" as the instance code for node profile objects in the case of general nodes and "02" in the case of transmit-only nodes.

Notes: For the PtoP program-selection Middleware Adapter, enter object information corresponding to a Ready Device to be connected. In the "Remarks" column, enter supported Ready Devices stated in 1 "Remarks on Devices to be Certified" in the Application for Conformance Certification.

	Group Code	Class Code	Class Name	Number of Instances	Instance Code	Remarks
Installed Object	OE	F0	node profile	1	1	
	0x02	0x7D	storage battery	1	1	APPENDIX M
	0x02	0x79	household solar power generation	1	1	APPENDIX M
